Gimme Care — brand impersonation scan (legal)

Client: **Gimme Care**

Date: **2026-07-06**

Flagged listings: **19**

[← All Gimme reports](#) · [Takedown letters & script](#)

Summary: No OJS parasite listings impersonating **Gimme Care** for GLP-1 were found (unlike Amble). Findings are third-party review/affiliate pages on non-gimme.care domains.

Executive summary

- **0** OJS pdfJsViewer listings with "Gimme Care" GLP-1 headlines on journal domains
- **0** paid Google Ads with parasite display URL + Gimme in headline
- **19** third-party organic pages mentioning Gimme Care on non-gimme.care domains (affiliate SEO / review farms — lower severity)
- **No** healthbenefit.vip / journal parasite redirect chain tied to Gimme Care impersonation

What is happening (for counsel)

Gimme Care has **not** been hit by the same journal-parasite campaign documented against Amble. Instead, we found **19 indexed third-party pages** on unrelated domains (e.g. `dshafjk.com`, `taoaadt.com`) that use **"Gimme Care"** in titles and snippets to rank for GLP-1 / tirzepatide queries — while the display URL is *not* gimme.care. These appear to be affiliate SEO / review-farm pages rather than compromised journals.

TrimRx and healthbenefit.vip are not implicated in the Gimme findings. We have **no verified redirect chain** from Gimme Care affiliate-farm URLs to `glp-1.healthbenefit.vip` or TrimRx. That parasite-journal → healthbenefit.vip pattern is documented on **Amble** only. Gimme counsel should pursue the **third-party domain operators and registrars** behind the spam pages — not TrimRx — unless future evidence links a specific destination.

What legal can do

- **Demand letters (10 business days):** Serve cease-and-desist on operators of the worst affiliate-farm domains (e.g. `dshafjk.com`, `taoaadt.com`) and file parallel registrar / hosting abuse complaints. Templates: [legal outreach pack](#).
- **Google Search removal:** Report sample indexed URLs from the CSV via Google spam / misleading-content channels.
- **Domain abuse:** WHOIS + registrar abuse complaints against domains systematically using Gimme Care in auto-generated review copy.
- **Monitor:** Re-run weekly SERP scan; escalate immediately if OJS journal-parasite pattern or healthbenefit.vip redirects appear for Gimme (as with Amble).

Takedown script

Use the script below for registrar / hosting abuse complaints, then escalate to formal demand letters in the [outreach pack](#) if infringing pages remain indexed after 10 business days.

Script — registrar / hosting abuse (internal)

DRAFT — customize before use. Full letters in [outreach pack](#).

Subject: Trademark abuse — GIMME CARE used on [dshafjk.com / taoaadt.com] without authorization

"Hello, I'm [Name] with counsel for Gimme Care (gimme.care).

We've documented multiple indexed pages on your customer's domain that use 'Gimme Care' in titles and snippets to rank for GLP-1 telehealth queries. Gimme Care did not authorize this use. The pages create a false impression of affiliation with our client.

We are requesting:

- 1) Immediate suspension or removal of the infringing URLs listed in our attachment;
- 2) Contact information for the site operator if you cannot act without it;
- 3) Written confirmation within 10 business days.

Enclosures: evidence report, SERP screenshots, URL inventory with indexed paths."

--- Parallel track (same day) ---

- Google: report 3–5 sample indexed URLs from our CSV (dshafjk.com, taoaad.com) as misleading / spam.
- WHOIS: identify registrant for dshafjk.com and taoaad.com; serve Letter A from outreach pack if contact found.

OJS parasite SEO (false positives excluded)

Searching `site:mattioli1885journals.com gimme` returns OJS spam with "Gimme" in CBD gummy headlines (e.g. "Gimme Gummies Cbd") — **not** Gimme Care telehealth. These are excluded from this report.

Query: site:dshafjk.com "gimme care"

Affiliate SEO farm (dshafjk.com) indexed with Gimme Care copy.

The screenshot shows a Google search interface. At the top, the search bar contains 'site:taoaadt.com gimme'. Below the search bar, there are three sponsored ads. Each ad has a percentage increase in a blue bubble: '+12.5%', '+9.2%', and '+6.8%'. The first ad is titled 'Upgrade your existing keywords to broad match' and includes a button 'Apply'. The second ad is titled 'Create a Performance Max campaign' and includes a button 'Get started'. The third ad is titled 'Raise your budgets' and includes a button 'Apply'. Below the ads, there is a link 'View more in Google Ads' with a right arrow. Below that, a search result snippet is shown for 'taoaadt.com' with the URL 'https://taoaadt.com › tirzepatide-gimme-care-protective'. The title of the result is 'tirzepatide gimme care - taoaadt.com' and the snippet text is '2 days ago — Tirzepatide functions as **Compounded tirzepatide a dual-agonist**, targeting both the'. At the bottom, the query is displayed as 'Query: site:taoaadt.com gimme care tirzepatide' and a note states 'Affiliate review-spam domain (taoaadt.com) with Gimme Care tirzepatide pages.'

Amble parallel (for legal context)

The Amble campaign uses journal parasite display URLs with post-click routing to healthbenefit.vip. **No parallel Gimme Care parasite campaign was identified** in the expanded scan (155 Amble parasite URLs vs 0 Gimme).

Google paid ads — methodology (parasite display-URL model)

Deceptive listings in this campaign do **not** show TrimRx or healthbenefit.vip in Google. They show a **parasite display URL** on a compromised journal domain (e.g.

`mattioli1885journals.com/.../pdfJsViewer`). The affiliate destination (`glp-1.healthbenefit.vip`) appears only *after* click-through redirects.

What we checked (2026-07-06)

1. **Live SERP paid-slot scan** — DataForSEO `serp/google/organic/live/advanced`, US (2840), desktop + mobile, depth 50. For each brand query, flag items where `type` is paid/ad/shopping or `ad_acclk_url` is present, headline mentions the brand, and display URL matches parasite patterns (`pdfJsViewer`, `signOut?source`, journal hosts, `.top` redirectors).
2. **Not used as primary test:** Ads Transparency pulls on `trimrx.com` / `healthbenefit.vip` — those domains are post-click destinations, not what Google displays in the listing.

Result: 0 paid listings with parasite display URLs + brand in headline for both Amble and Gimme Care on this scan date.

Recommended ongoing monitor (weekly)

1. **SERP parasite watch** — Re-run `scan-brand-parasite-serp.js` (or schedule via cron). Alert when `paid_parasite` count > 0 or `organic_parasite_unique_urls` increases week-over-week.
2. **Brand query set** — Maintain 15–20 queries per brand: brand name + GLP-1 terms, `site:mattioli1885journals.com {brand}`, `pdfJsViewer {brand}`, semaglutide/tirzepatide variants.
3. **Parasite URL signatures** — Match display/landing URLs against:
 - `/plugins/generic/pdfJsViewer/`
 - `signOut?source=.` or `signOut%3Fsource%3D.`
 - Journal hosts: `mattioli1885journals.com`, `journals.econsciences.com`, `jmbfs.org`
 - Attacker TLDs: `ojsnua44.top`, `dmouw13.top`, `cami680.top`
4. **Paid vs organic** — Treat any SERP item with `type: paid` or `ad_acclk_url` + parasite display URL as **P0 legal alert** (higher severity than organic parasite SEO).
5. **Manual spot-check** — Weekly screenshot of top 3 brand queries in a clean browser profile; compare Sponsored label vs organic journal-domain results.
6. **Google Ads Transparency (secondary)** — Search advertiser name contains "Amble" or "Gimme" and inspect creative preview images for journal-domain display URLs (OCR on preview if metadata lacks headline text).
7. **Post-click verification** — For any new parasite URL, sandboxed click trace: indexed URL → attacker subdomain → final LP domain. Log final URL separately from display URL.

Script path: `clients/amble/created/reports/scripts/scan-brand-parasite-serp.js` · Output: `clients/amble/context/analysis/brand-parasite-serp-scan.json`

Gemini / Google Search grounding (2026-07-06)

Gemini 2.5 Flash with Google Search grounding for "gimme care glp-1" returned legitimate third-party comparison/review listings (`parties365.com`, `bariatricreports.org`, `glpwinner.com`,

youtube.com). None use the OJS journal parasite pattern seen against Amble.

Internal legal / competitive intelligence — not for publication. Evidence: DataForSEO expanded parasite SERP scan + paid-slot check (2026-07-06).
