

Tweaking Agency

Amble — typosquat funnel evidence (FDA / trademark)

Client: **Amble Health** (joinamble.com)

Captured: **2026-08-21**

Live typosquats: **7** · Same network: **Yes**

Evidence pack: [context/analysis/copycat-domains-2026-08-21/](#) · Screenshots:
[created/reports/20260821_amble-typosquat-funnel-assets/](#)

FDA / brand finding: The letter naming “**Ambel**” maps to the typosquat **joinambel.com**, which is *not* Amble Health. All seven misspellings of [joinamble](#) redirect into one affiliate funnel: **GoWeightLoss** ([my-weight-loss.com](#)) → tracker [miamitrk.com](#) → seller **InstaRX** ([go.instarx.com](#)). Legitimate Amble remains only at <https://joinamble.com/>.

Are these domains the same network?

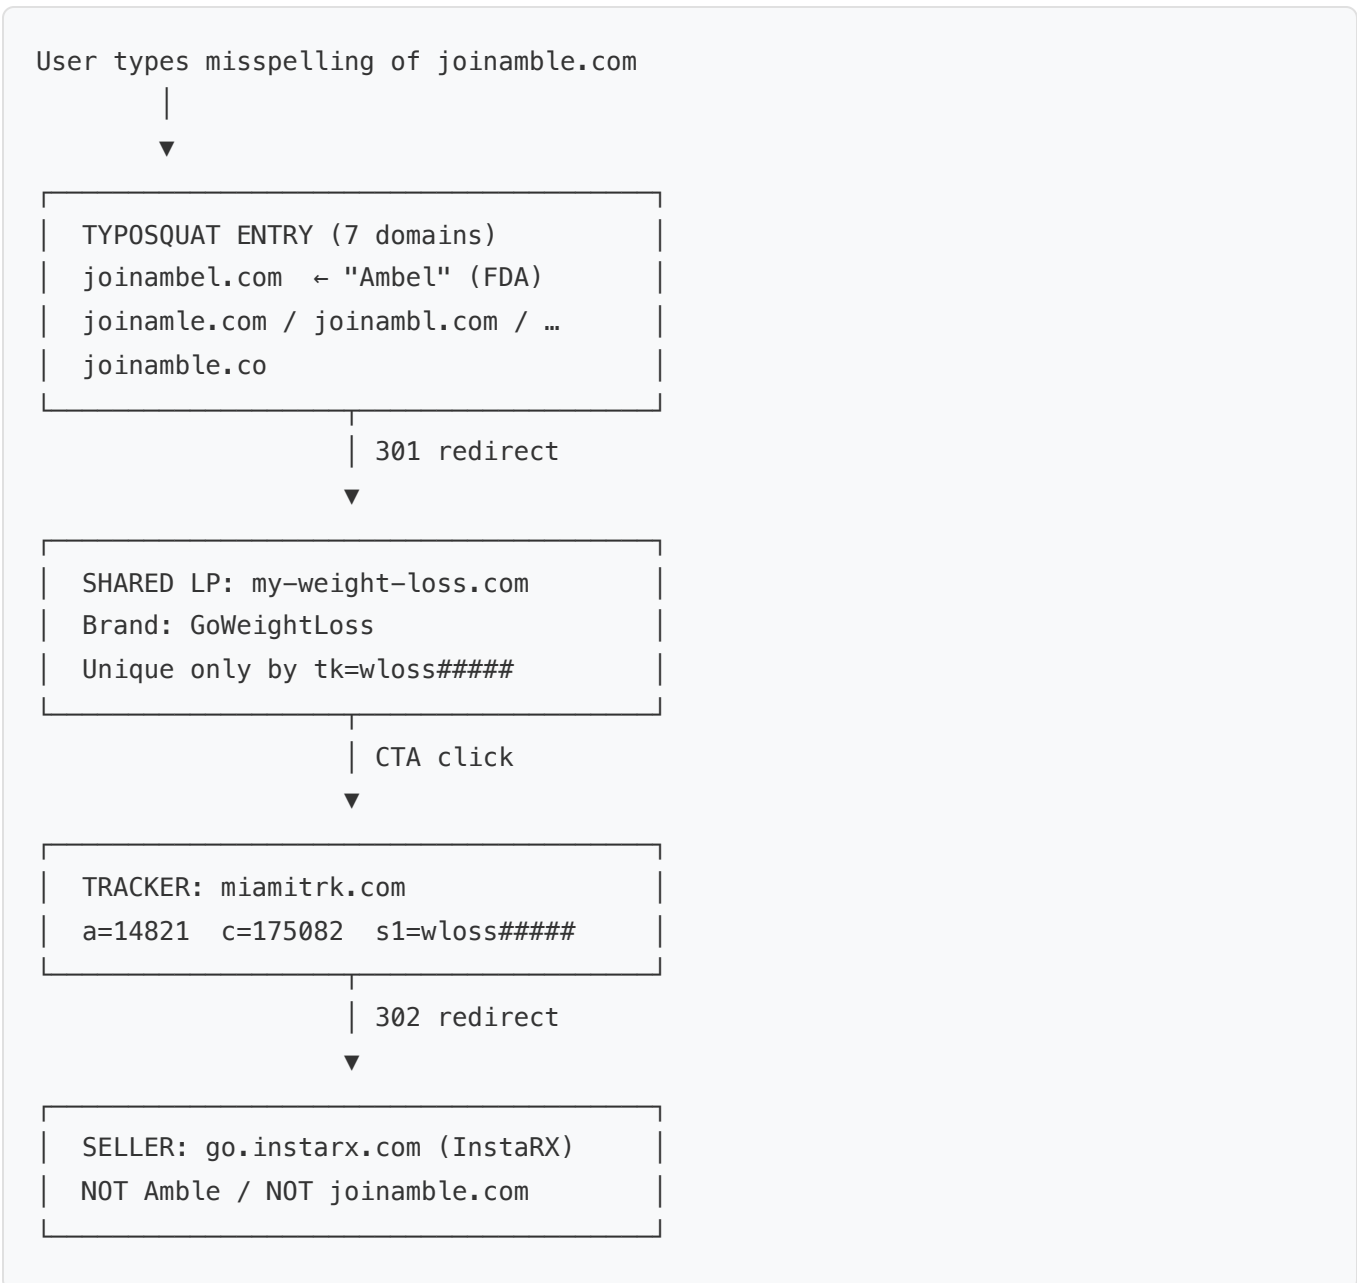

Yes — one coordinated affiliate / typosquat network. They are not separate businesses operating independently.

Same-network proof (all seven typosquats):

- Identical landing HTML after redirect (normalized SHA256 match across all saved pages)
- Same brand on page: **GoWeightLoss** · footer “Copyright © GoWeightLoss 2025”
- Same CTA pattern: [href.li](#) → [miamitrk.com/?a=14821&c=175082&s1=wloss#####](#)
- Same Clicky analytics ID: [101495572](#)
- Only difference per domain: the [tk=wloss#####](#) / [s1=](#) sub-affiliate tag
- Same final merchant after CTA: **InstaRX** ([utm_campaign=14821](#))

How the pieces relate:

- **Typosquat domains** (joinambel, joinamle, etc.) — traffic capture / brand confusion layer. Different registrars possible; same Cloudflare NS pair observed on sampled WHOIS.
- **my-weight-loss.com / GoWeightLoss** — shared advertorial landing page used by every typosquat.
- **miamitrk.com** — affiliate tracking hop (affiliate ID `14821`, offer `175082`).
- **InstaRX (go.instarx.com)** — the company that actually sells GLP-1s after the click. Contact on site: `patientcare@instarx.com` · (866) 673-8730.
- **joinamble.com (Amble)** — *not* in this funnel; separate brand, site, and enrollment stack.

Inventory — live funnels (2026-08-21)

ENTRY URL	TYPE	REDIRECTS TO	AFFIL. TAG	NETWORK
https://joinamble.com/	Legitimate	(stays on Amble)	—	Amble Health
http://joinambel.com/	Typosquat Ambel	my-weight-loss.com/semaglutide/	wloss10749	GoWeightLoss → InstaRX
http://joinamle.com/	Typosquat	same LP	wloss10489	Same network
http://joinambl.com/	Typosquat	same LP	wloss10614	Same network
http://joinanble.com/	Typosquat	same LP	wloss10616	Same network
http://joinamblee.com/	Typosquat	same LP	wloss10747	Same network
http://joiamble.com/	Typosquat	same LP	wloss10488	Same network
http://joinamble.co/	Wrong TLD	same LP	wloss11066	Same network
my-weight-loss.com (GoWeightLoss)	Shared LP	—	per-entry tags	Affiliate advertorial
https://go.instarx.com/start-glpi	Final seller	—	utm_campaign=14821	InstaRX

WHOIS (sampled): `joinamble.com` — Spaceship (created 2025-05-15), `abuse@spaceship.com` · `joinambel.com` — Cosmotown (created 2025-12-26), `abuse@cosmotown.com` · Both used Cloudflare NS `ajay.ns.cloudflare.com` / `zara.ns.cloudflare.com` . Full dump in evidence pack `whois.txt` .

Screenshot exhibits

Each exhibit overlays the **opened URL** and the **address bar after redirect** for Loom / counsel use.

 Legitimate joinamble.com

Exhibit A — Legitimate Amble

Opened `https://joinamble.com/` · stays on Amble branding

 joinambel.com funnel

Exhibit B — joinambel.com ("Ambel")

FDA-priority typosquat → GoWeightLoss `tk=wloss10749`

 joinamle.com funnel

Exhibit C — joinamle.com

Missing "b" → same GoWeightLoss LP `tk=wloss10489`

 joinambl.com funnel

Exhibit D — joinambl.com

Missing "e" → `tk=wloss10614`

 joinanble.com funnel

Exhibit E — joinanble.com

"n" for "m" → `tk=wloss10616`

 joinamblee.com funnel

Exhibit F — joinamblee.com

Extra "e" → `tk=wloss10747`

 joiamble.com funnel

Exhibit G — joiamble.com

Transposed letters → `tk=wloss10488`

 joinamble.co funnel

Exhibit H — joinamble.co

Wrong TLD → `tk=wloss11066`

 GoWeightLoss shared landing

Exhibit I — Shared GoWeightLoss LP

<https://www.my-weight-loss.com/semaglutide/> — advertorial used by all typosquats

 InstaRX destination

Exhibit J — Final seller InstaRX

<https://go.instarx.com/start-glp1> — not Amble

Loom recording order

1. <https://joinamble.com/> — control
2. <http://joinambel.com/> — “Ambel” / FDA priority (show address bar flip)
3. <http://joinamle.com/> and <http://joinamble.co/> — prove same network
4. Click “80% off Semaglutide” on GoWeightLoss LP
5. <https://go.instarx.com/start-glp1> — name the actual seller

Evidence pack contents

- `context/analysis/copycat-domains-2026-08-21/EVIDENCE-REPORT.md`
- `screenshots/` — numbered exhibits + prior captures
- `html/` — raw LP HTML for all seven typosquats (byte-identical after tag normalize)
- `redirect-chains.txt`, `cta-trace.txt`, `active-copycats.csv`, `whois.txt`
- `created/reports/20260821_amble-typosquat-funnel-assets/` — report-linked copies

Recommended next steps: Registrar abuse (Spaceship / Cosmotown / Cloudflare) · trademark counsel / UDRP on the seven domains · FDA response citing joinambel → InstaRX chain (this report + Loom).
