

Midi + Winona female HRT intake teardown

Client: Female HRT (TBD) Updated: 2026-07-20 Stop: Before payment

Executive verdict

Winona: Female HRT is *primarily* what the site offers — peri/menopause bioidentical HRT is the core product and the entire intake is built around prescribing it.

Midi: Female HRT is a *flagship* offer inside a broader midlife women's clinic (also weight management / GLP-1, AgeWell, general concerns). Model is insurance-first clinician visits, not a cash HRT subscription cart.

Winona HRT-first

Async quiz → recommended Rx plan with prices → identity gate. Cash / HSA-FSA; no insurance billing.

Midi HRT + more

Care-path quiz → account → contact confirm → insurance vs self-pay → (later) visit booking. Visit fees + pharmacy Rx.
