Week of Jun 15 ·
restarted campaign

Executive summary

TrimRx is not a single Google Ads account — it is a 3-advertiser affiliate network (MetaFit Pharma Solutions LLC, S-Class Media Pty Ltd, Ads Mavericks LLC) all pointing at trimrx.com. Confirmed Auction Insights show TrimRx climbing from near-zero to **29.31% impression share** by June 8 while Gimme fell to **11.67%** in the same NB Search auction.

The May 2026 ramp aligns with S-Class Media launching 4 new creatives (May 9–20) — the same period TrimRx's Auction Insights line inflects upward from the week of April 13. Gimme's restarted [Search_Tirzepatide_Semaglutide_V2](#) is spending \$861k/week but capturing only 21.7% IS with 65.8% rank-lost. **Verdict: Hybrid affiliate network** Confidence varies by advertiser — see discovery method table below.

Confirmed Auction Insights — legacy NB campaign

Source: Google Ads UI · Campaign [Search_Tirzepatide_Semaglutide](#) (paused) · Feb 1 – Jun 10, 2026 · Weekly frequency. Auction Insights cannot be pulled via API.

Search Auction Insights — weekly impression share by display URL domain. TrimRx (olive green) ramps from ~0% starting mid-April to 29.31% by June 8.

Week of June 8, 2026 — competitor impression share

DOMAIN	SEARCH IS	VS GIMME	NOTES
ro.co	48.76%	+37.1pp	Market leader
forhers.com	37.57%	+25.9pp	Strong upward trend from late April
trimrx.com	29.31%	+17.6pp	Aggressive ramp since Apr 13
lilly.com	23.62%	+12.0pp	Pharma brand presence
forbes.com	16.66%	+5.0pp	Content/affiliate
You (Gimme)	11.67%	—	Peaked ~25% late March, declining
webmd.com	11.49%	-0.2pp	Content publisher
medvi.org	<10%	—	Dropped to zero end of period

TrimRx ramp timeline

PHASE	PERIOD	TRIMRX BEHAVIOR
Dormant	Jan 26 – Apr 6	Near 0% — not in auction
Inflection	Week of Apr 13	First visible presence; steady climb begins
Aggressive ramp	Apr 13 – Jun 8	0% → 29.31% linear growth
Gimme decline	Mar – Jun	Gimme peaked ~25% (late Mar), fell to 11.67%

Gimme weekly impression share — API data

Source: Google Ads API · 90-day pull with 8-day conversion lag · Impression-weighted weekly rollup.

Search_Tirzepatide_Semaglutide_V2 (current NB — restarted mid-June)

WEEK	IS %	RANK-LOST %	BUDGET-LOST %	IMPRESSIONS	COST
Jun 8–14 (W24)	24.73	75.27	0.00	578,877	\$610,848
Jun 15–21 (W25)	21.73	65.82	12.45	865,356	\$860,796

Rank-lost IS dominates (66–75%). Spending \$611k–\$861k/week but capturing only ~22–25% IS. Competitors including TrimRx are outbidding Gimme on rank. Budget constraint emerging in W25 (12.5%).

Shopping_GLP-1_Subs — IS declining

WEEK	IS %	RANK-LOST %	BUDGET-LOST %	TREND
Apr 20 (W17)	52.06	7.71	40.23	Peak IS
Apr 27 (W18)	48.37	49.65	1.98	Rank pressure spike
May 18 (W21)	29.16	8.92	61.92	Budget constraint
Jun 1 (W23)	30.89	15.05	54.07	Budget + rank
Jun 15 (W25)	43.82	0.00	56.18	Budget-only loss

IS declined **11.2pp over 30 days** (44.6% → 33.4%). Estimated **589 conversion loss** (\$217k value) from IS decline.

Search_Brand — healthy baseline

Brand IS stable at **76–85%** across all weeks. The competitive battle is on NB Search and Shopping, not brand defense.

TrimRx account structure — affiliate network analysis

Source: Google Ads Transparency Center via DataForSEO · US market (location 2840) · 11 creatives returned · Pulled 2026-06-29

Advertiser	Verified	Creatives	First Shown	Last Shown	Role
MetaFit Pharma Solutions LLC AR03145052045162053633	Yes	5	2025-06-27	2026-06-28	Long-running core buyer
S-Class Media Pty Ltd AR15103560497078730753	Yes	4	2026-05-09	2026-06-29	May 2026 ramp — matches Auction Insights inflection
Ads Mavericks LLC AR07314605978291273729	Yes	3	2026-05-30	2026-06-02	Brief 3-day image ad burst

Discovery method & confidence (per advertiser)

What we can prove: Google Ads Transparency shows which verified accounts are running ads that land on `trimrx.com`. **What we cannot prove from this data alone:** whether TrimRx HQ directly employs each buyer, signed an affiliate contract, or controls their budgets.

Primary method (all three): DataForSEO `ads_search/live/advanced` API — domain target `trimrx.com`, US location 2840, depth 100. Returns `advertiser_id`, `advertiser_name`, Google verified status, creative dates, and Transparency Center URLs.

Advertiser	How we found it	Evidence	Confidence	Caveats
MetaFit Pharma Solutions LLC	DataForSEO Transparency pull for <code>trimrx.com</code>	5 creatives; verified; continuous Jun 2025 – Jun 2026; 2 text ads still active at pull	High · 90%	Generic pharma LLC name — third-party buyer, not TrimRx corporate account. No spend volume data.
S-Class Media Pty Ltd	Transparency pull + timing cross-check vs Auction Insights screenshot	4 text creatives launched May 9–20; still active Jun 29; ramp matches TrimRx IS 0% → 29%	High · 85% runs ads Med-high · 75% drives ramp	Australian media-buyer pattern fits affiliate model. Timing correlation strong but not spend-attributed.
Ads Mavericks LLC	DataForSEO Transparency pull for <code>trimrx.com</code>	3 image creatives; verified; active only May 30 – Jun 2 (3-day window)	Medium · 65%	Confirmed brief flight only — likely test burst, not sustained scale. May be immaterial to overall pressure.

Overall network verdict: High · 85% that TrimRx uses multiple third-party Google Ads accounts. Medium-high · 75% that structure is affiliate/performance marketing (not one agency with sub-accounts).

Destination URLs by advertiser

Yes — all three accounts send traffic into the TrimRx domain ecosystem. Display URLs below were read from Google ad creative preview images (DataForSEO `preview_image` field, pulled 2026-06-29). Final click URLs may include tracking parameters not visible without Transparency Center sign-in.

ADVERTISER	DISPLAY URLS IN ADS	VERIFIED DESTINATION	METHOD	CONFIDENCE
S-Class Media Pty Ltd	<code>www.trimrx.com/</code> <code>www.trimrx.com/discount</code>	trimrx.com/discount (HTTP 200)	Ad preview image from Transparency creative	High · 90%
MetaFit Pharma Solutions LLC	<code>www.trimrx.com/</code> <code>www.trimrx.com/glp1/weight-loss</code>	Homepage + GLP-1 quiz LP Sitelinks: Affordable GLP-1, Tirzepatide Weight Loss, GLP-1 Care	Ad preview image + RSA sitelinks visible in creative	High · 90%
Ads Mavericks LLC	<code>start.trimrx.com</code>	start.trimrx.com/intake/trimrx/glp1/height_weight Ad branded "GLP-1 USA" — not TrimRx corporate name	Ad preview image + HTTP redirect check	High · 88%

Comparison-site arbitrage funnel (not S-Class)

Discovered 2026-07-01. Separate affiliate publisher — **not** one of the three Google Ads Transparency accounts.

STEP	URL	NOTES
1. Comparison LP	bestweightloss.io/weight_loss_USA_D_ENG_comp_trimrx.html	TrimRx ranked #1; fabricated scores ("9.9 Outstanding", "31,481 User Votes") — not Trustpilot
2. TrimRx promo LP	trimrx.com/glp1/offer-v4-winter-4	Loads without affiliate ID ; with redirect: <code>affid=375</code> , <code>discount=SPRING140</code>
3. Intake	<code>start.trimrx.com/intake/trimrx?discount=join120</code>	BMI-first; no email gate

Additional TrimRx landing pages (public ecosystem)

These URLs exist on TrimRx's public web properties but are not yet mapped to a specific Google Ads advertiser account:

- [offers.trimrx.com](#) — affiliate-style offer pages (`/offer-v2` , `/offer-v24-quiz`)
- [trimrx.com/glp1/offer-v3](#), [trimrx.com/glp1/offer-v4-winter-4](#)
- [trimrx.com/semaglutide](#), [/tirzepatide](#), [/intake](#), [/start](#)

What would increase confidence

- Manual review of each Transparency Center advertiser profile (ad volume over time)
- Auction Insights on the current V2 campaign (confirms domain IS; does not name advertiser accounts)
- Landing-page redirect / affiliate tracking param analysis
- Second Transparency pull in 30 days (detects new advertiser IDs)

Not a single account. Three distinct verified Google Ads advertiser IDs — a media agency (S-Class, Australia), a pharma LLC (MetaFit), and an ads agency (Ads Mavericks) — all running ads to `trimrx.com`. This is consistent with an affiliate/performance marketing network, not a single TrimRx corporate Ads account scaling bids.

The May 2026 acceleration was driven primarily by **S-Class Media Pty Ltd** (4 new text creatives, May 9–20), layered on MetaFit's established presence since June 2025.

Live funnel architecture by affiliate

Source: Puppeteer live scrape 2026-06-29 with simulated Google Ads click params. Full notes: `context/competitor-ads/trimrx-funnel-teardown.md`

PATH	BUYER	STEP MAP	EMAIL GATE	PRICE BEFORE CONTACT
<code>trimrx.com/discount</code>	S-Class Media	Ad → Everflow SPA → quiz/intake	Affiliate ID — Everflow, not email	Unknown (meta: from \$179/mo)
<code>trimrx.com/glp1/weight-loss</code>	MetaFit Pharma	Ad → quiz LP	N/A — 404 in live scrape	N/A
<code>start.trimrx.com/intake/.../height_weight</code>	Ads Mavericks	Ad → BMI intake → Health → Details → Eligibility	No	No
<code>offers.trimrx.com/offer-v24-quiz</code>	Affiliate offers	Ad → promo LP → 4-step quiz → intake (<code>discount=join120</code>)	No	Yes — \$174/mo hero
bestweightloss.io → offer-v4-winter-4	Comparison publisher (<code>affid=375</code>)	Listicle → redirect → promo LP → intake	No	Yes — from \$149/mo
<code>trimrx.com/quiz</code>	Multiple	Redirects to <code>start.trimrx.com</code> BMI intake	No	No

Affiliate ID vs email on S-Class `/discount` : Fake `affid` values (14 tested) register Everflow tracking but **do not unlock** the SPA. **No email input** observed. Separate path: [offer-v4-winter-4](#) loads **without any affiliate ID**.

Working TrimRx paths (/promo , /get , offers.* , start.trimrx.com) render full content and pricing **without email**. Email capture exists only as an optional homepage newsletter. User-reported email gating may apply to post-quiz /results-a/b/c pages we could not reach without a live ad click.

Why TrimRx direct-to-intake works vs Gimme

TrimRx direct intake (start.trimrx.com) is **one buyer's path** (Ads Mavericks), not their whole strategy. Volume runs through offers.trimrx.com (price upfront → quiz → intake).

FACTOR	TRIMRX	GIMME
First intake step	BMI height/weight (clinical action)	Weight goal question (1 of 9)
Intake host	Dedicated start.trimrx.com	intake.gimme.care/wl
Ad → landing match	"\$179" in ad; price deferred in intake	"\$163/\$130" in RSA; checkout defaults \$199
Price before intake	offers.* shows \$174/mo + quiz first	Direct intake skips LP that anchored Feb–Apr success
Test isolation	Separate affiliate account per funnel	Single account — pollutes main tCPA
Auction context	Gaining IS (Apr–Jun ramp)	66–90% rank-lost IS (Jun 2026)

Why Gimme direct intake hasn't worked: Price-forward RSAs clash with \$199 checkout default; LP removed from path (LP-first worked Feb–Apr); intake → checkout CVR fell 9pp Mar–May; test launched during rank collapse.

Better models from TrimRx: (1) promo LP with upfront price + short quiz → intake (offers.* pattern), or (2) clinical-first RSAs without price in headlines until 3-month plan is pre-selected.

Funnel specialization

BUYER	OPTIMIZATION	EMAIL CAPTURE	PRICE ANCHORING
S-Class Media	Discount / goal-based pricing	Unknown (affiliate SPA)	Meta: from \$179/mo
MetaFit Pharma	Quiz / assessment	No (path 404)	Via quiz flow
Ads Mavericks	Speed-to-intake	No	Deferred to intake
Offers subdomain	Promo + inline quiz	No	Upfront (\$174–\$179)

Why TrimRx's affiliate network scaled

#	DRIVER	EVIDENCE	STRENGTH
1	Distributed auction presence	3 verified buyers = more simultaneous tests, more IS	High

#	DRIVER	EVIDENCE	STRENGTH
2	Funnel specialization by buyer	Discount / quiz / direct-intake / promo paths per account	High
3	Lead capture before price reveal	Affiliate attribution on /discount (not email)	Low
4	Aggressive rank buying	TrimRx IS 0% → 29.31%; Gimme rank-lost IS 66–90%	High
5	Creative/message diversification	Quiz, discount, "GLP-1 USA", promo vs Gimme price-led RSAs	High
6	Externalized media buying risk	Affiliates may accept worse unit economics short-term	Inference
7	Timing vs Gimme CVR decline	Ramp Apr 13; Gimme CPA \$274 → \$743 Feb–Jun	High

TrimRx overall media strategy

LAYER	TRIMRX	GIMME TODAY	GAP
Distribution	Multi-account affiliate network	Single in-house account	High
Acquisition	Search-heavy; quiz/discount/promo angles	Search NB + Shopping; price-led	Medium
Capture	Possible email gate on affiliate SPA	No email gate on paid LPs	Medium
Conversion	Quiz-first + direct-intake in parallel	LP-first; intake test in progress	Medium
Retention	Everflow + dual GTM + FigPii	PostHog + GTM	Unknown
Measurement	Per-affiliate independent optimization	Unified Smart Bidding	Structural

Gimme leverage matrix

Easiest high-leverage (do first)

RANK	INITIATIVE	WHY	EFFORT	OWNER
1	Launch direct-to-intake RSA test	Mirrors TrimRx quiz-first path (CSV ready)	Low	PPC
2	Test soft email capture LP	Gate personalized quote, not core offer	Low–Med	Dev + PPC
3	Keep AI Max OFF; prune auto assets	Stops irrelevant query matching	Low	PPC
4	Negative informational/competitor terms	Cut BMI calculator / competitor waste	Low	PPC
5	Stabilize V2 Smart Bidding	Restores auction entry (66–75% rank-lost)	Low	PPC
6	Export weekly Auction Insights on V2	Track TrimRx IS on restarted campaign	Low	PPC

Highest leverage even if hard

RANK	INITIATIVE	WHY	EFFORT	RISK
1	Dedicated quiz/discount LP system	Match TrimRx multi-funnel architecture	High (~4d dev)	Dev lead time
2	Email capture + nurture before intake	CRM/retargeting loop	High	Compliance + dev
3	Separate campaigns per funnel type	Parallel testing without polluting tCPA	Med	Account complexity
4	Quality Score / LP experience push	Cheaper IS recovery vs bid increases	Med	Dev + CRO
5	Performance-partner buying model	Structural match to TrimRx scale	Very High	Legal/policy/budget
6	Fix intake → checkout CVR	CPA math even with competitive pricing	Med	Dev + product

Do not copy: Multi-account evasion, misleading "GLP-1 USA" branding, hard email walls that hurt QS/trust in healthcare.

Do copy: Parallel funnel testing, price anchoring on offer pages, `gclid` preservation through intake (Gimme already confirmed via cookies).

Gimme TrimRx brand conquest

METRIC	VALUE
TrimRx-related query rows	809
Total spend	\$9,241
Clicks	393
Conversions	8.8
CPA	\$1,050 (target: \$400)

TrimRx brand conquest captures demand but at **2.6× target CPA**. Only `trimrx login` converts efficiently (2.5 conv). Most review/pricing/cost queries spend without return.

Recommendations

Immediate (this week)

- Do not chase TrimRx brand conquest harder** — \$1,050 CPA is not viable. Pause or cap `trimrx reviews`, `trimrx cost`, `trimrx pricing` unless LP/offer changes improve CVR.
- Diagnose NB V2 rank loss** — 66–75% rank-lost IS means TrimRx, ro.co, and forhers are outranking Gimme. Run Quality Score audit on flagged keywords before raising bids.

3. **Address Shopping budget constraint** — 56% budget-lost IS in W25. Review shared budget allocation vs NB Search V2 (\$861k/week).

Medium-term (2–4 weeks)

4. **Counter TrimRx's S-Class Media ramp** with QS/LP improvements (cheaper IS recovery) rather than pure bid increases.

5. **Monitor Transparency monthly** for new advertiser IDs — a 4th account signals another affiliate wave.

6. **Export Auction Insights weekly from UI** for the new V2 campaign — API cannot pull competitor-named IS.

Strategic context

7. **TrimRx is not the only threat** — ro.co (48.76%) and forhers.com (37.57%) dominate above TrimRx. A TrimRx-only response misses the larger picture.

8. **Campaign restart reset learning** — V2 relaunch means Smart Bidding is re-learning. Expect 2–3 weeks of rank volatility before stabilizing.

Data sources and limitations

DATA	SOURCE	LIMITATION
Gimme weekly IS	Google Ads API (automated)	Own-account metrics only
Auction Insights (legacy)	Google Ads UI screenshot	Cannot be API-pulled; paused campaign
TrimRx advertiser structure	DataForSEO → Transparency Center	Snapshot; 11 creatives
Search term conquest	Google Ads API	45-day window
TrimRx IS on V2 campaign	Not yet available	Requires manual Auction Insights export
Live funnel teardown	Puppeteer scrape 2026-06-29	/discount requires affiliate chain; email gate partial
