Gimme Care — brand impersonation scan (legal)

Client: **Gimme Care**

Date: **2026-07-06**

Flagged listings: **19**

[← All Gimme reports](#) · [Takedown letters & script](#)

Summary: No OJS parasite listings impersonating **Gimme Care** for GLP-1 were found (unlike Amble). Findings are third-party review/affiliate pages on non-gimme.care domains.

Executive summary

- **0** OJS pdfJsViewer listings with "Gimme Care" GLP-1 headlines on journal domains
- **0** paid Google Ads with parasite display URL + Gimme in headline
- **19** third-party organic pages mentioning Gimme Care on non-gimme.care domains (affiliate SEO / review farms — lower severity)
- **No** healthbenefit.vip / journal parasite redirect chain tied to Gimme Care impersonation

What is happening (for counsel)

Gimme Care has **not** been hit by the same journal-parasite campaign documented against Amble. Instead, we found **19 indexed third-party pages** on unrelated domains (e.g. `dshafjk.com`, `taoaadt.com`) that use "**Gimme Care**" in titles and snippets to rank for GLP-1 / tirzepatide queries — while the display URL is *not* gimme.care. These appear to be affiliate SEO / review-farm pages rather than compromised journals.

The same TrimRx / `healthbenefit.vip` affiliate ecosystem is tied to systematic **Amble** impersonation. Gimme should treat this as **proactive brand protection**: affiliates or competitors may expand the Amble playbook to Gimme Care if unchecked.

What legal can do

- **Preventive demand letter:** Send TrimRx a cease-and-desist requiring that no affiliate, agency, or LP use **Gimme Care** marks and that parasite-journal traffic not be monetized. Template: [legal outreach pack](#).
- **Google Search removal:** Report the worst affiliate-farm URLs (dshafjk.com, taoaad.com samples in CSV) via Google spam / misleading-content channels.
- **Domain abuse:** WHOIS + registrar abuse complaints against domains systematically using Gimme Care in auto-generated review copy.
- **Monitor:** Re-run weekly SERP scan; escalate immediately if OJS journal-parasite pattern appears for Gimme (as with Amble).

Takedown script

Use the script below for first contact with TrimRx affiliate compliance, then escalate to formal demand letters in the [outreach pack](#) if they do not remediate within 10 business days.

Script — initial call or email to TrimRx / affiliate compliance

DRAFT — customize before use. Full letters in [outreach pack](#).

Subject: Urgent — Unauthorized use of GIMME CARE in deceptive Google listings

"Hello, I'm [Name] with counsel for Gimme Care, the telehealth platform at gimme.care.

We've documented Google organic listings on third-party domains (e.g. dshafjk.com, taoaad.com) that use 'Gimme Care' in the headline or snippet while the display URL is not gimme.care. These pages appear designed to capture consumers searching for our client's GLP-1 telehealth services.

This creates a false impression that Gimme Care endorses or operates those pages. We are not affiliated with those domains or with TrimRx / healthbenefit.vip.

We need your team to:

- 1) Identify any affiliate, media buyer, or partner using 'Gimme Care', 'Gimme', or confusingly similar marks in search copy, metadata, or landing pages;
- 2) Terminate those relationships and take down infringing pages within 48 hours;
- 3) Confirm in writing within 10 business days what actions were taken; and
- 4) Preserve affiliate logs and contracts for any traffic referencing Gimme Care since June 2026.

I'm attaching our evidence report, SERP screenshots, and URL inventory. Who on your side owns affiliate compliance and can confirm takedown today?"

--- If they stall ---

"We've given you notice of unauthorized use of the Gimme Care mark in deceptive search listings. If affiliates aren't terminated, we'll proceed with Google abuse reports, registrar complaints, FTC referral, and injunctive relief. Please escalate to your General Counsel."

--- Parallel track (same day) ---

- Google: report 3–5 sample indexed URLs from our CSV (dshafjk.com, taoaadt.com) as misleading / spam.
- Registrars: abuse complaints against domains systematically using Gimme Care in auto-generated review copy.

OJS parasite SEO (false positives excluded)

Searching `site:mattioli1885journals.com gimme` returns OJS spam with "Gimme" in CBD gummy headlines (e.g. "Gimme Gummies Cbd") — **not** Gimme Care telehealth. These are excluded from this report.

Query: site:dshafjk.com "gimme care"

Affiliate SEO farm (dshafjk.com) indexed with Gimme Care copy.

The screenshot shows a Google search interface. At the top, the search bar contains 'site:taoaadt.com gimme'. Below the search bar, there are three sponsored ads. Each ad has a percentage increase in a blue bubble: '+12.5%', '+9.2%', and '+6.8%'. The first ad is titled 'Upgrade your existing keywords to broad match' and includes a button 'Apply'. The second ad is titled 'Create a Performance Max campaign' and includes a button 'Get started'. The third ad is titled 'Raise your budgets' and includes a button 'Apply'. Below the ads, there is a link 'View more in Google Ads' with a right arrow. Below that, a search result snippet is shown for 'taoaadt.com' with the URL 'https://taoaadt.com › tirzepatide-gimme-care-protective'. The title of the result is 'tirzepatide gimme care - taoaadt.com' and the snippet text is '2 days ago — Tirzepatide functions as **Compounded tirzepatide a dual-agonist**, targeting both the'. At the bottom, the query is displayed as 'Query: site:taoaadt.com gimme care tirzepatide' and a note states 'Affiliate review-spam domain (taoaadt.com) with Gimme Care tirzepatide pages.'

Amble parallel (for legal context)

The Amble campaign uses journal parasite display URLs with post-click routing to healthbenefit.vip. **No parallel Gimme Care parasite campaign was identified** in the expanded scan (155 Amble parasite URLs vs 0 Gimme).

Google paid ads — methodology (parasite display-URL model)

Deceptive listings in this campaign do **not** show TrimRx or healthbenefit.vip in Google. They show a **parasite display URL** on a compromised journal domain (e.g.

`mattioli1885journals.com/.../pdfJsViewer`). The affiliate destination (`glp-1.healthbenefit.vip`) appears only *after* click-through redirects.

What we checked (2026-07-06)

1. **Live SERP paid-slot scan** — DataForSEO `serp/google/organic/live/advanced`, US (2840), desktop + mobile, depth 50. For each brand query, flag items where `type` is paid/ad/shopping or `ad_acclk_url` is present, headline mentions the brand, and display URL matches parasite patterns (`pdfJsViewer`, `signOut?source`, journal hosts, `.top` redirectors).
2. **Not used as primary test:** Ads Transparency pulls on `trimrx.com` / `healthbenefit.vip` — those domains are post-click destinations, not what Google displays in the listing.

Result: 0 paid listings with parasite display URLs + brand in headline for both Amble and Gimme Care on this scan date.

Recommended ongoing monitor (weekly)

1. **SERP parasite watch** — Re-run `scan-brand-parasite-serp.js` (or schedule via cron). Alert when `paid_parasite` count > 0 or `organic_parasite_unique_urls` increases week-over-week.
2. **Brand query set** — Maintain 15–20 queries per brand: brand name + GLP-1 terms, `site:mattioli1885journals.com {brand}`, `pdfJsViewer {brand}`, semaglutide/tirzepatide variants.
3. **Parasite URL signatures** — Match display/landing URLs against:
 - `/plugins/generic/pdfJsViewer/`
 - `signOut?source=.` or `signOut%3Fsource%3D.`
 - Journal hosts: `mattioli1885journals.com`, `journals.econsciences.com`, `jmbfs.org`
 - Attacker TLDs: `ojsnua44.top`, `dmouw13.top`, `cami680.top`
4. **Paid vs organic** — Treat any SERP item with `type: paid` or `ad_acclk_url` + parasite display URL as **P0 legal alert** (higher severity than organic parasite SEO).
5. **Manual spot-check** — Weekly screenshot of top 3 brand queries in a clean browser profile; compare Sponsored label vs organic journal-domain results.
6. **Google Ads Transparency (secondary)** — Search advertiser name contains "Amble" or "Gimme" and inspect creative preview images for journal-domain display URLs (OCR on preview if metadata lacks headline text).
7. **Post-click verification** — For any new parasite URL, sandboxed click trace: indexed URL → attacker subdomain → final LP domain. Log final URL separately from display URL.

Script path: `clients/amble/created/reports/scripts/scan-brand-parasite-serp.js` · Output: `clients/amble/context/analysis/brand-parasite-serp-scan.json`

Gemini / Google Search grounding (2026-07-06)

Gemini 2.5 Flash with Google Search grounding for "gimme care glp-1" returned legitimate third-party comparison/review listings (`parties365.com`, `bariatricreports.org`, `glpwinner.com`,

youtube.com). None use the OJS journal parasite pattern seen against Amble.

Internal legal / competitive intelligence — not for publication. Evidence: DataForSEO expanded parasite SERP scan + paid-slot check (2026-07-06).
