Midi + Winona female HRT intake teardown

Client: Female HRT (TBD) Date: 2026-07-17 Stop: Identity verification (payment not required)

Executive verdict

Winona: Female HRT is *primarily* what the site offers — peri/menopause bioidentical HRT is the core product and the entire intake is built around prescribing it.

Midi: Female HRT is a *flagship* offer inside a broader midlife women's clinic (also GLP-1, cortisol support, general menopause care). Model is insurance-first clinician visits, not a cash HRT subscription cart.

Winona HRT-first

Async quiz → recommended Rx plan with prices → identity gate. Cash / HSA-FSA; no insurance billing.

Midi HRT + more

HRT LP → Book now → create-account identity form → (later) visit + questionnaire. Visit fees + pharmacy Rx.

Blockers / notes

- **Winona:** Stopped at identity verification (SSN last-4 or government ID upload). Payment not pursued per updated scope.
- **Midi:** Captured create-account identity form; address autocomplete made full account submission brittle. Sufficient for identity-depth comparison.
- Folder slug female-hrt is temporary until the real client name is known.
