

Tweaking Agency

Amble — brand impersonation (FTC referral)

Client: **Amble**

Date: **2026-07-06**

Flagged listings: **155**

[← All Amble reports](#) · [Legal counsel version](#)

FTC referral: 155 unique indexed Google listings use **Amble Health** headlines on compromised journal domains. **Display URLs** are parasite journal paths (e.g. `mattioli1885journals.com/.../pdfJsViewer`) — *not* joinamble.com. Post-click redirects route to glp-1.healthbenefit.vip (user-verified).

Executive summary

- **155** unique deceptive organic listings with parasite display URLs + Amble in headline (US desktop + mobile, DataForSEO expanded scan, 2026-07-06)
- **194** total SERP hits before URL deduplication (same URL may appear on multiple queries/devices)
- **0** paid Google Ads with parasite display URL + Amble in headline
- **Primary attack:** OJS pdfJsViewer open redirect + CVE-2024-4367 PDF.js exploit ([PKP forum](#))
- **Post-click beneficiary:** TrimRx LP at healthbenefit.vip (destination only — not visible in Google listing URL)

Summary for FTC review

Third parties are running a **parasite SEO** campaign against Amble Health. They exploit compromised academic journal websites (Open Journal Systems / `pdfJsViewer` paths on domains like `mattioli1885journals.com` and `journals.econsciences.com`) to get Google to index pages whose **headlines and snippets use "Amble Health"** — while the **display URL in search results is the journal domain**, not joinamble.com. A consumer searching for Amble reasonably believes the result is about our client.

When the user clicks, the listing does *not* go to joinamble.com. It follows an open-redirect / malicious-PDF chain through attacker infrastructure (`ojsnua44.top` , `dmouw13.top` , and related domains) and lands on a **compounded GLP-1 marketing page** at `glp-1.healthbenefit.vip` (TrimRx affiliate funnel). The deceptive brand use happens in **organic search**; the competitor destination appears only **after the click**. We have documented **155+ unique indexed URLs** in this pattern (SERP screenshots and CSV attached below).

Why this may violate FTC Act Section 5

- **Deceptive representation:** Search listings use the **Amble Health** name in headlines/snippets while the visible URL is an unrelated compromised journal domain — not joinamble.com. Consumers are likely to believe the result is Amble’s official site.
- **Material omission / bait-and-switch:** The competitor GLP-1 landing page at `glp-1.healthbenefit.vip` appears only *after* click-through through redirect infrastructure (`ojsnua44.top` , `dmouw13.top` , `cami680.top`). The deception is in organic search; the substitute seller is hidden until the click.
- **Scale:** **155+** unique indexed URLs documented (CSV below). Pattern is systematic, not isolated typosquatting.
- **Health / telehealth context:** Misleading routing in a regulated health category increases risk of consumer harm (wrong provider, wrong offer, unauthorized use of a trusted brand).
- **Statutory hook:** Conduct may violate **FTC Act Section 5** (15 U.S.C. § 45) — unfair or deceptive acts or practices — and related UDAP principles enforced by state attorneys general.

Entities / infrastructure to investigate

FTC staff may wish to trace commercial beneficiaries behind the indexed URLs. Known infrastructure from our investigation:

- **Unknown affiliate / performance-marketing operators** running journal-parasite SEO (vid= tracking on redirect domains)
- **Redirect infrastructure:** `ojsnua44.top`, `dmouw13.top`, `cami680.top`, `feelcools.com`, `cnaiiy2.top`
- **Landing-page operator:** `healthbenefit.vip` / `glp-1.healthbenefit.vip` (commercial beneficiary of post-click traffic — TrimRx affiliate funnel)
- **Compromised journal hosts** (display URLs): `mattioli1885journals.com`, `office2.jmbfs.org`, `journals.econsciences.com`, and others in CSV

How to file

- **FTC Report Fraud:** reportfraud.ftc.gov — select categories related to *imposter scams*, *online shopping*, and/or *health* as applicable; attach CSV + screenshots.
- **State AG:** Parallel consumer-protection complaint to the state where Amble Health is headquartered / where consumers are harmed.
- **Cross-reference:** Full legal-counsel evidence report (includes demand-letter track): [20260706_amble_brand-impersonation-legal.html](https://www.ftc.gov/20260706-amble-brand-impersonation-legal.html)

Suggested complaint narrative (copy/paste)

DRAFT — customize before submitting. Attach CSV download and SERP exhibits from this report.

I am reporting a systematic deceptive marketing scheme affecting consumers searching for Amble Health.

Third parties have indexed more than 155 Google organic results that display "Amble Health" in the title or snippet while the visible URL is a compromised academic journal site (not joinamble.com). When consumers click, they are routed through redirect domains (ojsnua44.top, dmouw13.top, and related infrastructure) to a third-party compounded GLP-1 marketing page at glp-1.healthbenefit.vip. Consumers reasonably believe they are engaging with Amble Health; they are not.

This appears to be affiliate-driven parasite SEO combined with post-click bait-and-switch routing in a telehealth context. I am attaching a URL inventory (CSV), SERP screenshots, and redirect-chain documentation. I request FTC review under Section 5 for deceptive commercial practices and coordination with state consumer-protection authorities as appropriate.

Exhibits to attach

1. URL inventory CSV (download below)
2. SERP screenshots in this report
3. Screen recording: indexed parasite URL → redirect chain → healthbenefit.vip
4. Written statement that Amble Health did not authorize use of its brand on the listed domains

Attack flow (display URL vs click destination)

Google listing

Headline: "Amble Health: Your Gateway to Affordable GLP-1 Plans"

Display: mattioli1885journals.com/.../pdfJsViewer/.../signOut?source=.ojsnua44.top&vid=...

↓ (user clicks)

302 → www.mattioli1885journals.com.ojsnua44.top

↓

Malicious PDF (FontMatrix JS) → ojsnua44.top/g.php?vid=...

↓

glp-1.healthbenefit.vip ← post-click only; NOT shown in SERP URL

Example (user-reported)

Query: "amble cares program"

Headline: Amble Health: Your Gateway to Affordable GLP-1 Plans

Indexed / display URL: [mattioli1885journals.com/pdfJsViewer \(vid=5vhMFFAeVa\)](https://mattioli1885journals.com/pdfJsViewer(vid=5vhMFFAeVa))

Post-click destination: glp-1.healthbenefit.vip

Journal hosts (by URL count)

How to Choose Between Amble and Local Tirzepatide

3 hours ago — Amble is the better choice for most people seeking affordable, convenient...

Query: amble tirzepatide site:mattioli1885journals.com

Amble tirzepatide listings on mattioli journal domain.

Recommended exhibits for FTC submission

1. SERP screenshots showing journal-domain display URL + Amble headline (not joinamble.com)
2. Screen recording: indexed parasite URL → redirect chain → healthbenefit.vip
3. WHOIS for ojsnua44.top, dmouw13.top, cami680.top
4. Google Safe Browsing / abuse reports for indexed parasite URLs

Google paid ads — methodology (parasite display-URL model)

Deceptive listings in this campaign do **not** show TrimRx or healthbenefit.vip in Google. They show a **parasite display URL** on a compromised journal domain (e.g.

`mattioli1885journals.com/.../pdfJsViewer`). The affiliate destination (`g1p-1.healthbenefit.vip`) appears only *after* click-through redirects.

What we checked (2026-07-06)

1. **Live SERP paid-slot scan** — DataForSEO `serp/google/organic/live/advanced`, US (2840), desktop + mobile, depth 50. For each brand query, flag items where `type` is paid/ad/shopping or `ad_acclk_url` is present, headline mentions the brand, and display URL matches parasite patterns (`pdfJsViewer`, `signOut?source`, journal hosts, `.top` redirectors).
2. **Not used as primary test:** Ads Transparency pulls on `trimrx.com` / `healthbenefit.vip` — those domains are post-click destinations, not what Google displays in the listing.

Result: 0 paid listings with parasite display URLs + brand in headline for both Amble and Gimme Care on this scan date.

Recommended ongoing monitor (weekly)

1. **SERP parasite watch** — Re-run `scan-brand-parasite-serp.js` (or schedule via cron). Alert when `paid_parasite` count > 0 or `organic_parasite_unique_urls` increases week-over-week.
2. **Brand query set** — Maintain 15–20 queries per brand: brand name + GLP-1 terms, `site:mattioli1885journals.com {brand}`, `pdfJsViewer {brand}`, semaglutide/tirzepatide variants.
3. **Parasite URL signatures** — Match display/landing URLs against:
 - `/plugins/generic/pdfJsViewer/`
 - `signOut?source=.` or `signOut%3Fsource%3D.`
 - Journal hosts: `mattioli1885journals.com`, `journals.econsciences.com`, `jmbfs.org`
 - Attacker TLDs: `ojsnua44.top`, `dmouw13.top`, `cami680.top`
4. **Paid vs organic** — Treat any SERP item with `type: paid` or `ad_acclk_url` + parasite display URL as **P0 legal alert** (higher severity than organic parasite SEO).
5. **Manual spot-check** — Weekly screenshot of top 3 brand queries in a clean browser profile; compare Sponsored label vs organic journal-domain results.
6. **Google Ads Transparency (secondary)** — Search advertiser name contains "Amble" or "Gimme" and inspect creative preview images for journal-domain display URLs (OCR on preview if metadata lacks headline text).
7. **Post-click verification** — For any new parasite URL, sandboxed click trace: indexed URL → attacker subdomain → final LP domain. Log final URL separately from display URL.

Gemini / AI Overview check

Gemini 2.5 Flash with Google Search grounding (2026-07-06) did **not** surface OJS parasite listings. It returned legitimate PR/editorial coverage. DataForSEO organic SERP remains the primary

evidence source for deceptive headlines.

Prepared for FTC / consumer-protection referral — internal use. Evidence: DataForSEO expanded parasite SERP scan + paid-slot check (2026-07-06).
