Gimme Care — brand impersonation (FTC referral)

Client: **Gimme Care**

Date: **2026-07-06**

Flagged listings: **19**

[← All Gimme reports](#) · [Legal counsel version](#)

Summary: No OJS parasite listings impersonating **Gimme Care** for GLP-1 were found (unlike Amble). Findings are third-party review/affiliate pages on non-gimme.care domains.

Executive summary

- **0** OJS pdfJsViewer listings with "Gimme Care" GLP-1 headlines on journal domains
- **0** paid Google Ads with parasite display URL + Gimme in headline
- **19** third-party organic pages mentioning Gimme Care on non-gimme.care domains (affiliate SEO / review farms — lower severity)
- **No** healthbenefit.vip / journal parasite redirect chain tied to Gimme Care impersonation

Summary for FTC review

Gimme Care has **not** been hit by the same journal-parasite campaign documented against Amble. Instead, we found **19 indexed third-party pages** on unrelated domains (e.g. `dshafjk.com`, `taoaadt.com`, `bariatricreports.org`) that use "**Gimme Care**" in titles and snippets to rank for GLP-1 / tirzepatide queries — while the display URL is *not* gimme.care. These appear to be affiliate SEO / review-farm pages rather than compromised journals.

TrimRx and healthbenefit.vip are not implicated in the Gimme findings. We have **no verified redirect chain** from Gimme Care affiliate-farm URLs to `glp-1.healthbenefit.vip` or TrimRx. That parasite-journal → healthbenefit.vip pattern is documented on **Amble** only.

Why this may violate FTC Act Section 5

- **Deceptive representation:** Third-party pages indexed by Google use **Gimme Care** in titles and snippets while hosted on unrelated domains (e.g. [dshafjk.com](#), [taoaadt.com](#), [bariatricreports.org](#)) — not gimme.care. Consumers may believe these are official or authorized Gimme pages.
- **Unauthorized brand use:** Gimme Care did not authorize use of its mark in this auto-generated review / affiliate SEO copy.
- **Scale: 19** indexed URLs documented (CSV below). Lower severity than the parallel Amble journal-parasite campaign but still deceptive branded interception of health searches.
- **No verified TrimRx tie:** Unlike Amble, we have **not** verified post-click routing to healthbenefit.vip for these Gimme URLs. Complaint focuses on misleading third-party branded listings, not a named competitor funnel.
- **Statutory hook:** Conduct may violate **FTC Act Section 5** (15 U.S.C. § 45) — unfair or deceptive acts or practices — particularly in health-related search advertising.

Entities / infrastructure to investigate

FTC staff may wish to trace commercial beneficiaries behind the indexed URLs. Known infrastructure from our investigation:

- **Affiliate SEO / review-farm operators** behind [dshafjk.com](#), [taoaadt.com](#), and similar domains in CSV
- **Third-party directories** using Gimme Care in headlines (e.g. [bariatricreports.org](#) listing pages)
- **Unknown affiliates** monetizing branded GLP-1 search traffic without authorization from Gimme Care

How to file

- **FTC Report Fraud:** [reportfraud.ftc.gov](#) — select categories related to *imposter scams*, *online shopping*, and/or *health* as applicable; attach CSV + screenshots.
- **State AG:** Parallel consumer-protection complaint to the state where Gimme Care is headquartered / where consumers are harmed.
- **Cross-reference:** Full legal-counsel evidence report (includes demand-letter track): [20260706_gimme_brand-impersonation-legal.html](#)

Suggested complaint narrative (copy/paste)

DRAFT — customize before submitting. Attach CSV download and SERP exhibits from this report.

I am reporting deceptive third-party use of the GIMME CARE brand in Google organic search results.

We documented 19 indexed pages on unrelated domains that use "Gimme Care" in titles or snippets to rank for GLP-1 telehealth queries, while the display URL is not gimme.care. Gimme Care did not authorize this use. These pages appear designed to intercept consumers searching for our telehealth service and create a false impression of affiliation.

This is lower severity than a parallel journal-parasite campaign documented against another GLP-1 provider (Amble Health), and we have not verified routing to a single competitor landing page. I am attaching a URL inventory (CSV) and SERP screenshots and request FTC review under Section 5 for deceptive health-related marketing.

Exhibits to attach

1. URL inventory CSV (download below)
2. SERP screenshots in this report
3. Sample click-path documentation for worst affiliate-farm URLs (if available)
4. Written statement that Gimme Care did not authorize use of its brand on the listed domains

OJS parasite SEO (false positives excluded)

Searching `site:mattioli1885journals.com gimme` returns OJS spam with "Gimme" in CBD gummy headlines (e.g. "Gimme Gummies Cbd") — **not** Gimme Care telehealth. These are excluded from this report.

Query: site:dshafjk.com "gimme care"

Affiliate SEO farm (dshafjk.com) indexed with Gimme Care copy.

The screenshot shows a Google search interface. At the top, the search bar contains 'site:taoaadt.com gimme care tirzepatide'. Below the search bar, there are three Google Ads. Each ad has a percentage increase in a blue bubble, a headline, a description, and a button.

Percentage Increase	Headline	Description	Button
+12.5%	Upgrade your existing keywords to broad match	Get more conversions at a similar or better ROI by adding broad match version...	Apply
+9.2%	Create a Performance Max campaign	Maximize performance for online sales, lead generation, store goals, or multiple...	Get started
+6.8%	Raise your budgets	Your ads stopped running or your busiest days. Fixing your limited budget can help.	Apply

Below the ads is a button that says 'View more in Google Ads →'. Below that is a search result snippet for 'taoaadt.com' with the URL 'https://taoaadt.com › tirzepatide-gimme-care-protective'. The snippet title is 'tirzepatide gimme care - taoaadt.com' and the text below it says '2 days ago — Tirzepatide functions as **Compounded tirzepatide a dual-agonist**, targeting both the'. At the bottom, the query is 'Query: site:taoaadt.com gimme care tirzepatide' and the description is 'Affiliate review-spam domain (taoaadt.com) with Gimme Care tirzepatide pages.'

Google paid ads — methodology (parasite display-URL model)

Deceptive listings in this campaign do **not** show TrimRx or healthbenefit.vip in Google. They show a **parasite display URL** on a compromised journal domain (e.g.

`mattioli1885journals.com/.../pdfJsViewer`). The affiliate destination (`glp-1.healthbenefit.vip`) appears only *after* click-through redirects.

What we checked (2026-07-06)

1. **Live SERP paid-slot scan** — DataForSEO `serp/google/organic/live/advanced`, US (2840), desktop + mobile, depth 50. For each brand query, flag items where `type` is paid/ad/shopping or `ad_acclk_url` is present, headline mentions the brand, and display URL matches parasite patterns (`pdfJsViewer`, `signOut?source`, journal hosts, `.top` redirectors).
2. **Not used as primary test:** Ads Transparency pulls on `trimrx.com` / `healthbenefit.vip` — those domains are post-click destinations, not what Google displays in the listing.

Result: 0 paid listings with parasite display URLs + brand in headline for both Amble and Gimme Care on this scan date.

Recommended ongoing monitor (weekly)

1. **SERP parasite watch** — Re-run `scan-brand-parasite-serp.js` (or schedule via cron). Alert when `paid_parasite` count > 0 or `organic_parasite_unique_urls` increases week-over-week.
2. **Brand query set** — Maintain 15–20 queries per brand: brand name + GLP-1 terms, `site:mattioli1885journals.com {brand}`, `pdfJsViewer {brand}`, semaglutide/tirzepatide variants.
3. **Parasite URL signatures** — Match display/landing URLs against:
 - `/plugins/generic/pdfJsViewer/`
 - `signOut?source=.` or `signOut%3Fsource%3D.`
 - Journal hosts: `mattioli1885journals.com`, `journals.econsciences.com`, `jmbfs.org`
 - Attacker TLDs: `ojsnua44.top`, `dmouw13.top`, `cami680.top`
4. **Paid vs organic** — Treat any SERP item with `type: paid` or `ad_aclk_url` + parasite display URL as **P0 legal alert** (higher severity than organic parasite SEO).
5. **Manual spot-check** — Weekly screenshot of top 3 brand queries in a clean browser profile; compare Sponsored label vs organic journal-domain results.
6. **Google Ads Transparency (secondary)** — Search advertiser name contains "Amble" or "Gimme" and inspect creative preview images for journal-domain display URLs (OCR on preview if metadata lacks headline text).
7. **Post-click verification** — For any new parasite URL, sandboxed click trace: indexed URL → attacker subdomain → final LP domain. Log final URL separately from display URL.

Gemini / Google Search grounding (2026-07-06)

Gemini 2.5 Flash with Google Search grounding for "gimme care glp-1" returned legitimate third-party comparison/review listings (parties365.com, bariatricreports.org, glpwinner.com, youtube.com). None use the OJS journal parasite pattern seen against Amble.

parasite SERP scan + paid-slot check (2026-07-06).
