Google Ads That Actually Work

## Amble survival kits — competitor research & Google Ads strategy

Full edition

Client: **Amble**

Date: **2026-06-15**

Scope: 8 prescription med kits on Webflow (joinamble.webflow.io/medkits/\*)

Research: Live Google Search & Shopping SERPs (US), competitor LP review, pricing analysis

[← All Amble reports](#)

### Executive summary

---

Amble's survival kits sit in a **prescription telehealth emergency-preparedness** category — not the OTC first-aid market. Your closest Google Ads competitors are **Jase Medical**, **The Wellness Company (TWC)**, **OZIO**, **Runway Health**, **JetSet Meds**, **Wandr**, **ReadyMed**, and **Heads Up Medical**. These brands dominate both **Search text ads** and **Shopping product carousels** on high-intent queries like *emergency antibiotic kit*, *travel emergency medical kit*, and *travel medicine kit online doctor*.

#### Key strategic implications:

1. **Do not treat Shopping as a generic “first aid kit” play.** Google Shopping for these queries mixes Rx kits (Jase, TWC, OZIO) with OTC Adventure Medical / MyMedic products (\$33–\$250). Amble must segment campaigns by intent and use feed titles that signal *physician-prescribed emergency medications*, not bandages-and-gauze kits.
2. **Jase and TWC are the paid-search gatekeepers** on preparedness and antibiotic-kit terms. Amble's price points (\$285–\$945) are competitive with Jase Case (\$290) and TWC Travel Kit (\$275), but **above** travel-focused entrants (Runway à la carte, Wandr \$199–\$224, JetSet Weekender \$195, ReadyMed \$279).
3. **Scenario-specific kits are Amble's differentiation.** Most competitors sell one general antibiotic case plus small add-on SKUs (dental, UTI, cruise). Amble's eight use-case kits

(travel, viral, cold/flu, allergy/mold, radiation, field emergency, first aid + Rx) map to **long-tail Search** and **dedicated landing pages** — a structural advantage if LPs are fixed and certified for Google Rx policy.

4. **Before scaling spend:** confirm **Google Healthcare / prescription drug services certification** (and LegitScript if applicable), fix landing page content bugs (empty “What’s included” sections, irrelevant NAD+ testimonials), and set **kit-specific conversion values** (\$285–\$945 AOV vs. current ~\$200 GLP-1 default).

## Amble product portfolio

| KIT                    | LP URL                    | PRICE | POSITIONING                                                                                                  |
|------------------------|---------------------------|-------|--------------------------------------------------------------------------------------------------------------|
| Just in Case           | /medkits/just-in-case-kit | \$285 | General emergency readiness — 9 Rx meds (antibiotics, antivirals, anti-parasitics, antifungals, anti-nausea) |
| Mayday                 | /medkits/mayday-kit       | \$325 | Travel emergency — infections, nausea, altitude, cough, traveler’s stomach                                   |
| Viral Ick              | /medkits/viral-ick-kit    | \$325 | Viral infections — antivirals, anti-inflammatories, nebulizer                                                |
| Cold Reaper            | /medkits/cold-reaper-kit  | \$325 | Cold & immunity — 8 Rx for respiratory illness, fever, nausea                                                |
| Breathe Easy           | /medkits/breathe-easy-kit | \$325 | Mold & allergy — asthma/allergy/inflammation Rx                                                              |
| Oh Sh*t<br>(Radiation) | /medkits/oh-sht-kit       | \$345 | Radiological emergency preparedness                                                                          |
| Ouch Pouch             | /medkits/ouch-pouch-kit   | \$425 | First aid + Rx — broader wound/infection/anaphylaxis coverage                                                |
| Panic Pack             | /medkits/panic-pack-kit   | \$945 | Flagship field emergency — broad Rx + supplies for off-grid/extended emergencies                             |

**Shared LP strengths:** HSA/FSA eligible, 100% online intake, licensed providers, free shipping, flat transparent pricing, strong compliance/disclaimer blocks.

**Shared LP weaknesses (fix before paid traffic):**

- “What’s included” sections show **“No items found”** on several kits (Mayday confirmed; likely CMS/feed issue).

- Testimonials reference **NAD+ / weight loss**, not med kits — hurts message match and trust for emergency-medicine buyers.
- Primary CTA is **“Get started”** (intake) without price anchoring or kit comparison — competitors use **“Add to cart”** with clearer SKU merchandising.

## Competitive landscape

### Tier 1 — Direct Rx kit competitors (primary Google Ads threat)

| COMPETITOR           | HERO SKU                    | PRICE        | GOOGLE PRESENCE                                                                                          | LP / OFFER MODEL                                                                                                                 |
|----------------------|-----------------------------|--------------|----------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------|
| Jase Medical         | JaseCase (10 meds)          | \$289.95     | <b>Dominant</b> — top Shopping carousel + Search ads on nearly every preparedness query; also CTV (MNTN) | Shopify ecommerce, scenario SKUs (Go \$130, Mission \$380, Dental/UTI/Cruise \$100), JasePlus membership (15% off), 4.9★ reviews |
| The Wellness Company | Travel Emergency Kit        | \$247–\$275  | <b>Heavy Search</b> — “Our Med Kit Is Simply Better”, comparison tables vs others                        | LegitScript badge, subscription -10%, guidebook + OTC supplies bundled, 2–3 week ship                                            |
| OZIO                 | Basic Medical Emergency Kit | \$197.55     | <b>Shopping ads</b> on travel/Rx kit queries                                                             | Tiered line: Advanced \$591, Pro \$1,344; intake required before ship                                                            |
| ReadyMed             | Travel Pack                 | \$279 (sale) | Organic + affiliate; less visible in top Search ads                                                      | 10 antibiotics/meds, consult included                                                                                            |
| Heads Up Medical     | Adult Travel/Emergency Kit  | \$279.95     | Organic; scenario kits \$80–\$299                                                                        | Consult included in kit price                                                                                                    |

## Tier 2 — Travel medicine telehealth (different funnel, overlapping keywords)

| COMPETITOR      | MODEL                           | PRICE                                 | GOOGLE PRESENCE                                                |
|-----------------|---------------------------------|---------------------------------------|----------------------------------------------------------------|
| Runway Health   | Build-your-kit + \$30 consult   | Meds \$29–\$129 each                  | Search ads: “Travel Meds, No Hassle”, destination clinic LP    |
| Wandr           | Destination-personalized kit    | \$199–\$224/kit; à la carte from \$24 | Newer; physician-founded, pharmacy pickup option               |
| JetSet Meds     | Weekender / JetSet kits         | \$195 / \$495                         | Organic visibility; 24/7 US physician chat                     |
| TravelMeds2Go   | Consult → local pharmacy pickup | Consult-only pricing                  | Search ads: “No Appointment Required — 24 Hrs”                 |
| Prepare Medical | Modular kits (CAD)              | Essential ~\$350 USD equiv.           | Organic on “prepare medical kit”; allergy/travel/virus add-ons |

## Tier 3 — OTC/adjacent (Shopping noise, not true Rx competitors)

| COMPETITOR                           | PRICE RANGE   | ROLE IN AUCTIONS                                                              |
|--------------------------------------|---------------|-------------------------------------------------------------------------------|
| Adventure Medical Kits               | \$33–\$180    | Owns “travel first aid kit” Shopping slots; OTC only                          |
| MyMedic                              | \$127–\$1,200 | Trauma/IFAK Shopping; HSA/FSA; no Rx                                          |
| PrepEM Wild                          | \$90–\$250    | Physician-designed <b>trauma</b> kits; Shopping on some queries; OTC supplies |
| Surviveware, Johnson & Johnson, etc. | \$10–\$60     | Volume Shopping; wrong intent for Amble                                       |

**Important:** Tier 3 competitors inflate Shopping CPCs and attract price-sensitive clicks. Amble should **exclude** generic “first aid kit” and “IFAK” themes unless running a deliberate awareness campaign with strict audience filters.

# Live Google Search findings (US, June 2026)

---

Query: **emergency antibiotic kit prescription**

## Sponsored Shopping (top of SERP):

- Jase Case — "10 Essential Rx Meds... + Access to Doctors"
- TWC Travel Emergency Kit — "Doctor-Prescribed Meds for Travelers"
- Jase Go, Jase Mission, Jase Dental, Jase UTI
- OZIO Basic / Advanced / Pro Medical Emergency Kit
- TelyRx — standalone Rx products (Doxycycline, Amoxicillin) — **keyword policy risk** for uncertified advertisers
- PrepEM Wild — physician-designed essentials (OTC trauma)

## Sponsored Search (text):

- TWC — "See Why Our Med Kit is Better"
- Jase — "Emergency Medications"

**Organic:** jase.com, jasemedical.com, preparemedical.com, Reddit r/preppers discussions, AOA skepticism article, CDC travel health.

**People also search for:** *Best emergency antibiotics kit, Emergency medical kit with antibiotics as seen on TV, Emergency antibiotics for preppers, Antibiotic kits online* — signals **prepper + Fox-news-adjacent** demand alongside travel.

**Query:** travel emergency medical kit prescription

**Sponsored Search:**

- TWC — "Our Med Kit: Simply Better"
- Jase — "Most Trusted Antibiotic Kit — Travel & Emergency Meds"
- Medjet, EA+ Travel Assistance — **insurance/adjacent** bidders on travel medical terms (monitor for wasted spend if you bid broadly)

**Popular products (organic Shopping module in SERP):**

- Adventure Medical Smart Travel / World Travel kits
- MyMedic Portable / EDC kits
- FSA Store Emergency Travel Kit Bundle

**Takeaway:** Travel queries trigger **both** Rx kit ads and OTC travel first-aid products. Amble **Mayday** should compete on Rx-specific copy; avoid unqualified "travel medical kit" without "prescription" or "doctor-prescribed" modifiers.

**Query:** travel medicine kit online doctor

**Sponsored Search:**

- TravelMeds2Go — "Get Prescription in 24 Hrs"
- Runway Health — "Travel Meds, No Hassle"
- TWC — med kit comparison
- PlushCare — generic telehealth (broad match bleed)

**Sponsored Shopping:** Same Jase/TWC/OZIO carousel as above.

**Organic:** runwayhealth.com, jetsetmeds.com, travelmeds2go.com, traveldoc.com, mdanywhere.com.

**Takeaway:** This query skews **consult-first** (Runway, TravelMeds2Go) vs **kit-first** (Jase, TWC). Amble can win with hybrid messaging: *"Online doctor review included — kit ships free."*

# Google Shopping competitive patterns

---

## Who buys Shopping placement for Rx-adjacent kits?

1. **Jase Medical** — widest SKU coverage (Case, Go, Mission, Dental, UTI, Trauma)
2. **The Wellness Company** — Travel + First Aid Emergency kits
3. **OZIO** — Basic / Advanced / Pro tiers
4. **FSA Store** — resells Adventure Medical (OTC) alongside emergency bundles

## Typical Shopping titles that win impressions

- Lead with **use case + Rx signal**: "Emergency Antibiotic Kit – 10 Essential Rx Meds..."
- Include **physician trust**: "Doctor-Prescribed", "Physician Prescribed"
- Include **scope**: "30+ Conditions", "Traveler's Diarrhea", "UTI", "Dental"

## Price bands in Shopping carousel (Rx kits)

- **Entry**: \$130–\$200 (Jase Go, OZIO Basic, JetSet Weekender)
- **Core**: \$250–\$350 (Jase Case, TWC Travel, ReadyMed, Heads Up, Amble Just in Case / Mayday)
- **Premium**: \$380–\$650 (Jase Mission, JaseMedic)
- **Ultra**: \$945–\$1,344 (Amble Panic Pack, OZIO Pro, Jase Max bundles)

## Shopping strategy implication for Amble

- Feed **8 SKUs** with unique titles per scenario — do not collapse to one generic "Amble Med Kit."
- Use **custom labels**: rx\_kit, travel, viral, prepper, premium.
- Set **aggressive negative keywords** on Shopping campaigns: *bandage, IFAK, tourniquet, OTC, refill only*.
- Consider **Performance Max with asset groups per kit** only after conversion tracking assigns correct values per SKU.

# Competitor landing page teardown

---

## Jase Medical (jase.com) — benchmark

- **Merchandising:** Clear SKU grid, price on card, "Add to cart" ecommerce flow
- **Trust:** 1,695+ reviews, 4.9 rating, Glenn Beck endorsement, JasePlus membership upsell
- **Education:** Medication-by-condition matrix, add-ons, PocketParamedic hotline
- **Creative angle:** Preparedness for supply chain disruption, grid-down, travel — fear + control

## The Wellness Company (twc.health) — aggressive paid competitor

- **Merchandising:** Comparison table ("Included in Your Kit vs Others")
- **Trust:** LegitScript certified, 4.9 rating, phone ordering, subscription discount
- **Offer:** 15+ meds + supplies + guidebook; treats 30+ conditions
- **Creative angle:** "Simply Better" direct comparison — expect conquest pressure

## Runway Health — travel consult model

- **Merchandising:** À la carte meds with prices (\$29–\$129) + \$30 consult
- **Trust:** Travel Insured partnership, destination-specific recommendations
- **Friction:** Lower upfront price but assembly burden on user
- **Amble counter:** "One kit, pre-selected by scenario — no guesswork"

## OZIO — price leader on Shopping

- **Merchandising:** Tiered good/better/best (\$198 / \$591 / \$1,344)
- **Trust:** With/without kit comparison copy
- **Amble counter:** Stronger brand (100k+ members) and scenario naming vs generic "Basic/Pro"

## Google Ads policy — prescription drug services

---

Amble med kits require compliance with [Google's prescription drug services policy](#):

- **Certification required** to promote online prescribing/dispensing in the US

- Ads may run **"Eligible (limited)"** even when certified — restricted drug terms in copy/keywords
- Landing pages must be fully functional, globally accessible, and match certification scope
- Violations are **egregious** (account suspension risk)

#### **Operational checklist before launch:**

1. Confirm Amble's Google Ads healthcare certification status for **prescription drug services** (separate from GLP-1 campaigns if scope differs).
2. Confirm **LegitScript** (or equivalent) — TWC prominently displays this; it's becoming table stakes for trust and may affect approval.
3. Avoid uncertified use of drug names in ad text (e.g., azithromycin, doxycycline) — use condition-based copy ("traveler's diarrhea support", "emergency antibiotic kit").
4. Ensure LPs include required disclaimers (Amble LPs already have strong ISI/disclaimer blocks).

## **Recommended Google Ads strategy**

---

### **1. Positioning & message architecture**

#### **Primary value props (test in order):**

1. **Physician-prescribed emergency medications shipped to your door** — matches Jase/TWC category language
2. **Scenario-specific kits** — "Built for travel / viral season / mold exposure / radiation preparedness" (Amble-only)
3. **100,000+ patients + HSA/FSA eligible** — trust + payment flexibility
4. **Flat price, no hidden fees, consult + shipping included** — vs Runway's consult + à la carte

#### **Avoid:**

- Competing on "best first aid kit" or "trauma kit" without Rx qualifier
- Fear-mongering beyond what competitors already use (match tone, don't exceed)
- Generic "survival kit" without medical/legal context

## 2. Campaign structure

Account: Amble Med Kits (separate from GLP-1 or linked with strict budget caps)

- |— Brand – Amble Med Kits
  - |— joinamble med kit, amble mayday kit, amble survival kit, etc.
- |— NB – Core Preparedness [Search]
  - |— AG: Emergency Antibiotic Kit (Just in Case, Panic Pack)
  - |— AG: Prepper / Emergency Meds (prepper terms, supply chain angles)
  - |— LP: Just in Case / Panic Pack
- |— NB – Travel [Search + Shopping]
  - |— AG: Travel Emergency Kit (Mayday)
  - |— AG: Travel Medicine Online (vs Runway/Wandr)
  - |— LP: Mayday
- |— NB – Seasonal / Scenario [Search]
  - |— AG: Cold & Flu (Cold Reaper, Viral Ick)
  - |— AG: Allergy & Mold (Breathe Easy)
  - |— AG: First Aid + Rx (Ouch Pouch)
  - |— AG: Radiation Prep (Oh Sh\*t) – low volume, high intent, monitor closely
- |— Competitor [Search]
  - |— Jase Medical, Jase Case, Jase Go
  - |— Wellness Company / TWC travel kit
  - |— Runway Health, JetSet Meds, ReadyMed, OZIO
  - |— LP: Kit comparison page (recommended build) or closest Amble SKU
- |— Shopping – Rx Kits Only [Standard Shopping or PMax asset group]
  - |— 8 SKUs with scenario titles; exclude OTC match types via negatives
- |— Discovery/Test [PMax or Demand Gen]
  - |— Creative: scenario hooks, UGC-style preparedness, travel departure windows

### Budget starting point (within existing \$10k/mo account or incremental):

- If med kits are **new line**, allocate **20–30% of incremental budget** for first 60 days while GLP-1 remains core — scale only when kit CPA < 25–35% of kit AOV.
- **Do not** reuse GLP-1 Target CPA (\$50) — kit AOV \$285–\$945 supports higher CPAs; model break-even separately.

### 3. Keyword strategy by kit

| KIT                            | PRIORITY KEYWORDS (PHRASE/EXACT)                                                                                      | MATCH TO COMPETITOR                           |
|--------------------------------|-----------------------------------------------------------------------------------------------------------------------|-----------------------------------------------|
| <b>Just in Case</b>            | emergency antibiotic kit, emergency meds kit online, prescription emergency kit, prepper antibiotic kit               | Jase Case, OZIO Basic                         |
| <b>Mayday</b>                  | travel emergency kit prescription, travel medical kit antibiotics, travel medicine kit online, cruise travel meds kit | TWC Travel, Jase Go, JetSet Weekender         |
| <b>Viral Ick / Cold Reaper</b> | antiviral emergency kit, cold flu prescription kit, viral infection kit online doctor                                 | Jase (limited direct SKU); own the niche      |
| <b>Breathe Easy</b>            | mold allergy medication kit, allergy asthma emergency kit prescription                                                | Heads Up Pollen Free, Jase Seasonal Allergies |
| <b>Oh Sh*t</b>                 | radiation emergency kit potassium iodide prescription, nuclear preparedness meds                                      | Very niche; Jase add-ons — low spend cap      |
| <b>Ouch Pouch</b>              | prescription first aid kit, emergency wound infection kit                                                             | MyMedic (OTC) — use “prescription” modifier   |
| <b>Panic Pack</b>              | comprehensive emergency medical kit prescription, field emergency medication kit, off grid medical kit                | Jase Case Max, OZIO Pro, Prepare Medical      |

#### Negative keyword themes (account-level):

- OTC: bandage, gauze, tourniquet, IFAK, trauma kit (unless Ouch Pouch AG), free, DIY, homemade
- Wrong intent: nursing, veterinary, dental office compliance, epic medical refill
- Job seeking, wholesale, military surplus

### 4. Ad copy frameworks (RSA)

#### Preparedness (Just in Case):

- H1: Emergency Antibiotic Kit Online
- H2: Prescribed By a Licensed Provider
- H3: 9 Rx Meds — One Flat Price
- D1: HSA/FSA eligible. Free shipping. Online intake, meds shipped to your door.
- D2: Be ready when care isn’t reachable. Amble Just in Case Kit from \$285.

#### Travel (Mayday):

- H1: Travel Emergency Kit — Rx Meds
- H2: Doctor Review Included | Free Ship
- H3: Mayday Kit For Travel Illness
- D1: Infections, nausea, altitude & more. 100% online. No hidden fees.

#### Competitor (Jase conquest):

- H1: Prescription Emergency Med Kits
- H2: Scenario-Specific — Not One-Size-Fits-All
- H3: Travel, Viral, Allergy & More
- D1: Amble kits from \$285. HSA/FSA eligible. Licensed providers. Get started online.

**Policy-safe rule:** Lead with *conditions and kit names*, not drug generic names.

### 5. Landing page & CRO priorities (pre-spend)

| PRIORITY | ISSUE                                  | RECOMMENDATION                                                                           |
|----------|----------------------------------------|------------------------------------------------------------------------------------------|
| P0       | Empty “What’s included”                | Fix Webflow CMS so each kit lists medications/supplies — competitors win on transparency |
| P0       | NAD+ testimonials on med kit LPs       | Replace with med-kit-specific social proof or clinician trust badges                     |
| P1       | No kit comparison / selector           | Add “Which kit is right for me?” quiz or comparison table vs buying wrong SKU            |
| P1       | “Get started” only CTA                 | Test “See what’s included” + price anchor above fold (Jase/TWC pattern)                  |
| P2       | Mayday vs Just in Case overlap         | Clarify differentiation in copy — travel-specific vs general preparedness                |
| P2       | Comparison page for competitor traffic | TWC-style “why Amble” without naming unapproved claims                                   |

### 6. Shopping feed requirements

For each of the 8 kits, feed should include:

- **Title:** {Kit Name} | Prescription Emergency Med Kit | {Primary use case} | Amble

- **Description:** Condition coverage, provider review, HSA/FSA, ship time — no drug claims that violate policy
- **Price:** Match LP exactly (\$285–\$945)
- **Link:** Kit-specific Webflow URL (already exists)
- **Google product category:** Health & Beauty > Health Care > Medicine & Drugs (verify with feed auditor)
- **Custom label 0:** Margin tier
- **Custom label 1:** Use case (travel / viral / prepper / premium)

**Competitive pricing note:** Amble **Just in Case (\$285)** is parity with **Jase Case (\$290)** — Shopping battles will come down to reviews, ship time, and title relevance. **OZIO Basic (\$198)** undercuts; counter with trust (100k patients) and scenario breadth, not race-to-bottom.

7. Measurement & economics

| METRIC             | GLP-1 (CURRENT)      | MED KITS (RECOMMENDED)                                    |
|--------------------|----------------------|-----------------------------------------------------------|
| AOV                | ~\$200               | \$285–\$945 (use dynamic values)                          |
| Primary conversion | Purchase             | Purchase (post-intake checkout)                           |
| Micro-conversions  | Begin checkout       | Intake started, intake completed                          |
| Target CPA         | \$50                 | 15–25% of kit AOV initially (\$43–\$236 depending on SKU) |
| LTV                | \$7,500 subscription | Replenishment + cross-sell GLP-1/other Amble lines        |

**Attribution:** 14-day lag likely applies to telehealth intake → approval → purchase. Exclude last 14 days from optimization decisions (align with existing `business.md` lag setting).

**Cross-sell:** Med kit buyers are high-trust telehealth adopters — build audiences for GLP-1 remarketing separately (privacy/compliance permitting).

# Kit launch priority matrix

| PRIORITY           | KIT                     | RATIONALE                                                                  |
|--------------------|-------------------------|----------------------------------------------------------------------------|
| 1 — Launch first   | Just in Case            | Direct Jase Case competitor; highest search volume in category             |
| 2                  | Mayday                  | Strong travel query overlap; TWC/Jase Go competition but clear LP          |
| 3                  | Cold Reaper / Viral Ick | Seasonal demand Q4–Q1; less direct SKU competition                         |
| 4                  | Ouch Pouch              | Differentiated Rx + first aid; avoid OTC Shopping collision with negatives |
| 5                  | Breathe Easy            | Niche but identifiable allergy/mold audience                               |
| 6                  | Panic Pack              | High AOV justifies high CPA; smaller volume — use for prepper/high-intent  |
| 7 — Test carefully | Oh Sh*t (Radiation)     | Very niche; geopolitical news spikes; policy/scrutiny sensitivity          |

# Competitive response playbook

| IF COMPETITOR...                            | AMBLE RESPONSE                                                                |
|---------------------------------------------|-------------------------------------------------------------------------------|
| Jase pushes JasePlus 15% discount           | Highlight Amble flat pricing + HSA/FSA; test bundled replenishment offer      |
| TWC runs “Simply Better” comparison ads     | Publish factual kit comparison LP; bid competitor brand on Search             |
| Runway/Wandr capture “online travel doctor” | Mayday ads stress <i>kit included</i> vs assemble-yourself à la carte         |
| OTC brands inflate Shopping CPCs            | Separate Shopping campaign; strict negatives; consider Search-only for launch |
| Policy disapprovals on drug terms           | Pivot to condition-based copy; verify certification scope                     |

# Summary: how to market these on Google

1. **Treat this as a new product line** with its own campaign shell, conversion values, and CPA targets — not an extension of GLP-1 bidding.

2. **Lead with Search + Shopping on Rx-intent keywords** where Jase and TWC already prove demand; use eight scenario LPs as the message-match weapon.
3. **Fix LP content bugs and testimonials** before spending — you will lose to Jase/TWC on trust if medication lists are empty.
4. **Confirm healthcare certification** and build Shopping feed with scenario-specific titles.
5. **Launch Just in Case + Mayday first**, expand to seasonal kits, conquest Jase/TWC/Runway on brand and comparison terms.
6. **Exclude OTC first-aid intent** from kit campaigns to protect CPA.
7. **Model unit economics per SKU** — Panic Pack at \$945 can absorb \$150+ CPA; Just in Case needs tighter efficiency.
